

Sameera Manaf

Full Stack Developer (React + Django)

+971585133244 | +919656005815 | sameeramanaf55@gmail.com | github.com/sameera-kp | linkedin.com/in/sameera-manaf-dev

Professional Summary

Full Stack Developer with hands-on experience building scalable web applications using React, Next.js 15, Python, and Django REST Framework. Proven ability to develop end-to-end solutions — responsive React frontends, Redux Toolkit state management, and secure Django REST APIs with PostgreSQL. Passionate about clean code and delivering production-ready applications.

Technical Skills

Frontend: React.js, Next.js 15, JavaScript, TypeScript, HTML5, CSS3, SCSS, Bootstrap

UI & State: Material UI (MUI), Tailwind CSS, Redux Toolkit, Context API

Backend: Python, Django, Django REST Framework (DRF), REST API, **FastAPI**, GraphQL

Databases: PostgreSQL, SQLite

Tools: Git, GitHub, Vercel, Postman, VS Code, **WebSockets**, **REST APIs**

Projects

CRM Live Project - Full Stack CRM Platform

Tech Stack: Next.js 15, React, TypeScript, Redux Toolkit, Material UI, Python, Django REST Framework, PostgreSQL

- Built full stack CRM covering Deals, Leads, Contacts, and Companies — Next.js/React frontend with Django REST API backend.
- Developed REST APIs for CRUD operations, stage/owner/city/date filtering, pagination, and CSV import/export.
- Implemented Redux Toolkit slices with async thunks; built reusable MUI tables, drawer forms, and filter components.
- Resolved full stack bugs: React StrictMode duplicate API calls, undefined Redux state, and Django migration errors.

Expense Tracker - Personal Finance Web App

Tech Stack: Python, Django, Django REST Framework, SQLite | github.com/sameera-kp/expense-tracker-django

- Built a full stack personal finance app with expense categorization, monthly summaries, and CRUD via REST API.
- Designed Django models and serializers for managing user expenses and financial records.

Kitchen Display System (KDS) - Real-Time Restaurant Management

Tech Stack: FastAPI, Python, React, WebSockets, SQLAlchemy, SQLite, Tailwind CSS |

- Built a real-time Kitchen Display System (KDS) to streamline order processing between front-of-house staff and kitchen display units.
- Implemented **WebSockets** in **FastAPI** to instantly stream new orders and status updates (**PENDING**, **PREPARING**, **READY**) without page refreshes.
- Designed and configured SQLite database models using SQLAlchemy ORM for order items, table management, and menu tracking.
- Developed a responsive React.js frontend with dynamic menu rendering and kitchen-status dashboards.

Experience

Full Stack Developer Intern (React + Django) June 2025 - Present Upcode Software Labs

- Delivered a live CRM platform as full stack developer — React/Next.js frontend with Python/Django REST Framework backend.
- Integrated REST APIs across Deals, Leads, Contacts, and Companies modules with filtering, pagination, and token authentication.
- Improved data loading by 20% through API optimization; boosted performance and SEO by 25% using Next.js SSR and code splitting.
- Collaborated in an Agile team of 5+ developers, consistently delivering sprint goals ahead of schedule.

Certifications & Achievements

- Successfully built and deployed full stack web applications including a live CRM platform used in production.
- Gained end-to-end full stack experience — React/Next.js frontend through Django REST API backend.
- Delivered production-ready features consistently as part of an Agile development team.
